INTRODUCTION

This report presents demographic and social characteristics of the migrant and non-migrant population 5 years and over, for Canada and the provinces.

In the 1971 Census, a person's "migration status" was determined by the response to a question relating to place of residence five years earlier, that is, on June 1, 1966. If residing in the same municipality five years prior to the 1971 Census, the person was classified as a "non-migrant" even though he or she may have changed dwellings within the municipality or have moved out of the municipality and returned to it within the five-year period. If the place of residence five years ago was outside the municipality of present residence, the person was classified as a "migrant".

The data in this report relate to the migration status of persons 5 years and over. Although the question was not asked of persons under 15 years, the migration status of persons 5-14 years was assumed to be the same as that of the family head (or the household head for a non-family person).

Canadian residents stationed abroad in the Armed Forces or the diplomatic service are excluded from all census tables dealing with internal migration. This will explain the fact that, for Canada as a whole, the total number of migrants and non-migrants is about 36,000 fewer than the total population 5 years and over.

Census definitions relating to age, ethnic group, official language, religion and level of schooling, have been given in earlier reports of the Volume I series.

Intermunicipal moves: This refers to the number of moves from one Canadian municipality to another between June 1, 1966 and May 31, 1971. Moving away and returning to the same municipality was counted as two moves. Persons coming to Canada from another country did not count their arrival in Canada as a move, but included any moves made within Canada. The moves of students to attend school or to take summer employment were not counted. For persons 5-14 years, the number of moves was considered the same as the number of moves made by the family head (or household head in the case of non-family persons).

The following chart summarizes the migration status of the Canadian population 5 years and over:

Ce bulletin présente les caractéristiques démographiques et sociales des migrants et des non-migrants de 5 ans et plus, pour le Canada et les provinces.

Au recensement de 1971, le "statut migratoire" était déterminé par la réponse à une question portant sur le lieu de résidence cinq ans plus tôt, soit le 1^{er} juin 1966. Les "non-migrants" sont les personnes qui demeuraient dans la même municipalité cinq ans avant le recensement de 1971, même si, entre-temps, elles ont changé de logement dans la municipalité ou sont parties puis revenues dans la municipalité. Les "migrants" sont les personnes dont le lieu de résidence cinq ans avant le recensement était en dehors de leur municipalité de résidence le jour du recensement.

Les données présentées ici concernent le statut migratoire des personnes de 5 ans et plus. La question ne s'adressait pas aux personnes de moins de 15 ans; c'est pourquoi, il a fallu imputer aux personnes de 5-14 ans le statut migratoire du chef de famille (ou du chef de ménage dans le cas d'une personne hors famille).

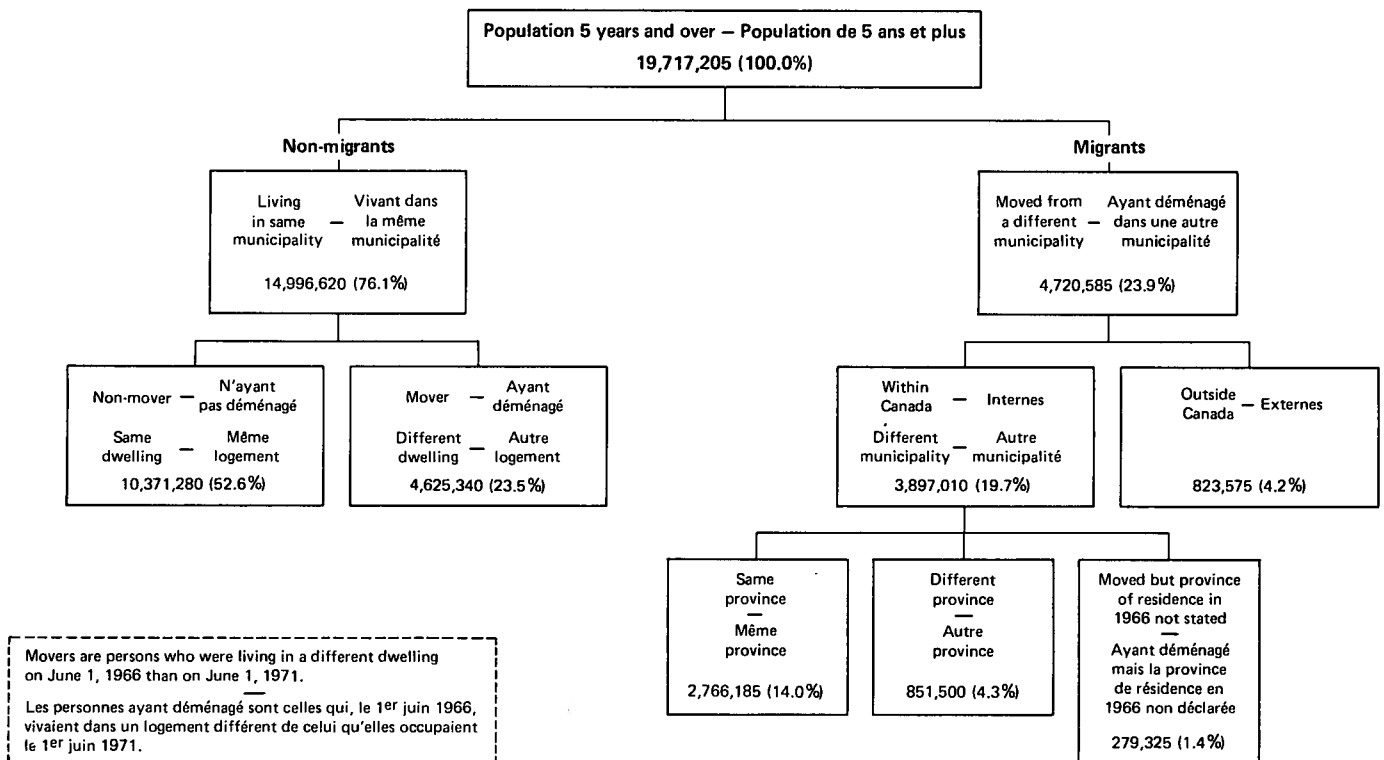

Les résidents du Canada membres des Forces armées ou du corps diplomatique en poste à l'étranger ne sont pas pris en compte dans les tableaux du recensement portant sur les migrations internes, ce qui explique que, pour l'ensemble du Canada, le nombre total de migrants et de non-migrants soit d'environ 36,000 inférieur à la population totale de 5 ans et plus.

Les concepts relatifs à l'âge, au groupe ethnique, à la langue officielle, à la religion et au niveau de scolarité ont déjà été définis dans d'autres bulletins du volume I.

Déplacement intermunicipal: Déplacement d'une municipalité canadienne à une autre entre le 1^{er} juin 1966 et le 31 mai 1971. Le fait de déménager puis de revenir au même endroit a été compté comme deux déplacements. Les personnes venant de l'étranger n'ont pas compté leur arrivée au Canada comme un déplacement; elles ont compté uniquement leurs déplacements à l'intérieur même du Canada. Les déplacements d'étudiants allant étudier ou allant occuper un emploi d'été ne sont pas comptés. Pour les personnes de 5-14 ans, on a considéré que le nombre de déplacements était le même que pour le chef de famille (ou le chef de ménage dans le cas des personnes hors famille).

Le graphique suivant illustre le statut migratoire de la population canadienne de 5 ans et plus:

The information in this report was collected on a 33 1/3% sample basis. As a result, the population for a given geographic area may differ from that shown in reports containing data collected on a 100% basis. **The latter figures, of course, represent the official population counts (see Catalogue Nos. 92-704 to 92-707).**

The 1971 Census figures in this report have been subjected to a confidentiality procedure to prevent the possibility of associating small figures with any identifiable individual. The particular technique used is known as "random rounding". Under this method, all last or "unit" digits in a table (including all totals) are randomly rounded (either up or down) to "0" or "5". This technique provides the strongest possible protection against direct, residual, or negative disclosures without adding any significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions. Similarly percentages, which are calculated on rounded figures, do not necessarily add to the total. Also, minor differences can be expected for corresponding totals and cell values in various census reports.

The estimates of the mean square error for the characteristics covered in this report were not available at the time of publication. They will be available in the introductory report to this volume (Catalogue No. 92-741). Those users requiring this information prior to the release of the introductory report should contact the Census User Inquiry Service.

Les renseignements de la présente publication ont été recueillis par un échantillonnage de 33 1/3 %. Il s'ensuit que les chiffres de population pour une région géographique donnée ne sont pas forcément les mêmes que ceux des publications dont les données avaient été recueillies à 100 %. **Bien entendu, c'est ce dernier chiffre qui représente le dénombrement officiel de la population (voir les publications nos 92-704 à 92-707 au catalogue).**

Par souci de confidentialité, les chiffres de 1971 publiés ici ont été soumis à une formule qui garantit l'impossibilité d'associer des chiffres de faible importance à une personne reconnaissable. Cette technique particulière s'appelle l'"arrondissement aléatoire". Grâce à cette méthode, tous les derniers chiffres, c'est-à-dire les chiffres des unités, des tableaux (y compris tous les totaux) sont arrondis de façon aléatoire (vers le haut ou vers le bas) à "0" ou à "5". Cette technique assure la protection maximale contre la divulgation directe, négative ou par recoupements, sans ajouter d'erreur significative aux données. Toutefois, puisque les totaux sont arrondis séparément, ils ne sont pas nécessairement égaux à la somme des chiffres individuels arrondis dans les distributions. De même, la somme des pourcentages calculés à partir de chiffres arrondis ne correspond pas forcément au total. Aussi, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences.

Les estimations de l'erreur quadratique moyenne des caractéristiques données dans ce bulletin n'étaient pas disponibles au moment de la publication. Elles seront disponibles dans le rapport introductoire de ce volume (no 92-741 au catalogue). Les utilisateurs demandant ce renseignement avant la publication du rapport introductoire devraient s'adresser au Service-utilisateurs, Recensement.

Altogether, there are some 225 reports in this series prepared in such a way that by removal of their covers the contents can be combined to form the materials comprising the 6 volumes and 25 separate volume parts in the entire series. A hard-covered binder, suitably titled, is included in the composite price to purchasers of the complete set of reports for any given volume part.

Catalogue of reports

A catalogue is available which describes the individual reports in the Volume Series of 1971 Census publications as well as reports in other series (i.e., Advance Series, Census Tract Series, and Special Series). The catalogue also includes a price list and an order form. A copy of this catalogue may be obtained from Publications Distribution, Statistics Canada, Ottawa K1A 0T6. For further information on census publications, address your inquiry to Information Division, Statistics Canada.

Enclose payment with your order in the form of a cheque or money order made payable to the Receiver General of Canada. Other forms of publication

In addition to the tabulated results of the 1971 Census published in reports and bulletins, a large number of tables will be issued to users as copies of computer print-outs. These will also be available in microform. A variety of statistical tables may be purchased on computer "summary" tapes for further computer analysis by users. Details of the content, prices, and availability of census tabulations in these output media may be obtained from the User Inquiry Service, Census Field, Statistics Canada, Ottawa K1A 0T7.

Special tabulations

To the extent that confidentiality constraints permit, Statistics Canada will produce for users at cost, special tabulations not already included in the planned tabulation programme. Requests should be sent to the Census User Inquiry Service specifying clearly the precise classifications or cross-classifications and the geographic areas. The exact categories for each characteristic and a rough table layout should be included.

Maps and geographic files

Large-scale maps may be purchased to show the boundaries of enumeration areas (i.e., the territory covered by each Census Representative in taking the census), as well as small-scale maps of census divisions and other statistical areas. Supporting documentation relating to the census geographic files (i.e., place names, codes, etc.) are available in tabular form identifying the component enumeration areas of administrative and statistical units (e.g., towns, villages, municipalities, tracts). Further details, including costs to users, may be obtained from the User Inquiry Service of the Census Field of Statistics Canada.
